

Community Information and input documentation.

On July 13, 2020 we held a Community input meeting at the Waleska Fire station public meeting room.

The following were in attendance:

Tom Ware
Ken Pritchett
Mark Green
Annette Green
Dave Beedle
Kelly Beedle
Mike Dawson
Marie Dawson
Phillip White
Kelly Zisser
Mark Roberts
Eve Elkins
Betty Turner
Dave Turner

Meeting

Meeting began at 6:30 PM

First Item discussed was the general description of the intended use of the property for the special use permit.

No objections were raised but the list of concerns are herein noted.

The first concern was that the level of noise would be too loud and continue late into the night. We assured them that contractually the occupants will be required to keep the volume down to a pleasant level and music will be suspended at 10 PM.

The next concern was that the attendees would not be parking along the road as the ball park attendees do. We assured that our parking will be in the parking area on the property. Any overflow will be contained in the field.

The final concern was that the road from tract 1 to tract 3 will not be used as a transient from Ball Field Rd to Land Rd. We assured them that it is only a driveway and would not be used as a transient roadway!

The meeting adjourned at approximately 7:00 without any disagreements or unanswered questions.
